Switch to safe living

'ELITE' Lifestyle modular switches with protective technology

Price effective 1 September, 2010

PHILIPS

sense **and** simplicity

Live the designer life

Designer cars. Designer apparel. Designer products. Designer homes. Life is increasingly all about making elegant choices and living it up in style. While designer walls are now in vogue, aesthetically designed switches too are keeping pace. Here again, you want the assurance that you and your loved ones are safe.

Now, live the designer life, spending less time worrying and more time living.

Introducing

Philips 'ELITE' lifestyle modular switches with new age designs and protective technology

Built to exacting international engineering standards, with aesthetic sense, new-age designs and packed with safety features, Philips lifestyle modular switches ensure safety in all situations. These are guaranteed to withstand the harshest environments, with three unique features:
1. Dual shutter technology
2. Triple protection technology
3. Front removal and insertion technology

RoHS compliant

General features

Front mounting and removing of inserts
• POP remains intact even while doing repairs
• Easy to install and change insert position

RoHS compliant design
• Environmentally safe. Future ready

Shrouded terminals
• No risk of getting a shock

Captive screws
• Screws will not fall off, even if completely unscrewed

Satin finish
• Elegant looks
• Easy to clean

Flexible platform of mounting grid and cover frames
• Suitable for uneven wall finishes as well
• Suitable for most of the available mounting boxes
• Great strength due to unique honeycomb construction

Wood mounting
• Can be fitted on the metal box and wood wall, no special mounting fixture required

Colour options
• White
• Wood
• Orient jade

Letting children play safely

Child proof sockets with **Dual**_shutter_® technology

Philips modular switches with safe technology :
- Ensures that the earth pin remains closed even when using a two pin plug.
- The sockets have one shutter for the two pin connection and separate shutter for the earth pin.

Relaxed, carefree living

Safe even with wet hands, thanks to unique **Tripple**_Protection_® technology | Philips modular switches with safe technology have shock resistant Polycarbonate which ensures highest degree of insulation.
- In-built spark shield to minimize sparking risk.
- Close tolerances and snug-fit components reduce water seepage.

Unique shutter mechanism not applicable for universal socket

Smart way to preserve your designer walls

## Innovative front removal and insertion technology

Now, with innovative Philips front removal and insertion technology, you need just change a non-functional part if required or replace the screw less switch unit, without disturbing the whole fitting. Yes, prolonging the life of your custom designed designer walls or interiors, was never so easy. Come, live the smart life.

Controllers

Special features for controllers
• No radio frequency interference
• Good ventilation assures no heat generation
• Energy conservative design
• Extended life span for 360° rotary knob for step regulators
• Fan regulator - Standard rating :100W, Voltage : 240V AC
• Dimmers - Rating : 600W and 1000W, Voltage : 240V AC

913702302501 (12NC)   913702302601 (12NC)
